

Authors Instructions

Submission of Papers (size DIN A4)

Language

Papers should be written in English, and authors are responsible for language quality. Authors, whose native language is not English, are recommended to arrange for proof reading by a native speaker before submitting their manuscripts. This will expedite the review process.

- **Fonts and Colours:**

An easy-to-read font such as Times New Roman should be used.

Colour images can only be included for 300 dpi in Cyan, Magenta, Yellow and Black (CMYK).

- **Electronic format:**

It is strongly encouraged to use MS Word for text and formula, and EPS, TIFF, JPG, CorelDraw or Adobe Illustrator for the figures can be used. Grayscale scans should be at least 300 DPI and bitmap line-scans 600 DPI resolution.

- **Files required:**

The entire paper should be contained within one file, if possible. Soft copies of all illustrations should be provided, accepted in EPS, TIFF, JPG, GIF or BMP formats. All illustrations should be embedded in the text and at the same time, illustrations should be made available as individual files. Please use correct, logical names for each illustration. For production reasons, the entire paper should also be made available in PDF format along with the above files.

- **Alternative solutions:**

If soft copies of the illustrations are not available, authors are requested to submit good quality glossy prints. Figure numbers must be clearly labelled on the back of each print, indicating up/down through the use of arrows.

If electronic transmission is not possible, the original plus four double-sided copies of each paper and a CD-ROM or diskette containing at least the text should be sent to the selected member of the main Editorial Board.

The length of a paper should not exceed 10 pages, including formula (one formula is three lines and equals 30 words), figures and tables (figures and tables are 12 lines and equal 120 words) or 20 pages typed in 9pt Times New Roman with a single spacing, including the synopsis, illustrations and photographs. **Shorter papers of significance will be given preference.**

Format

- The author's name and address should appear under the title with details of position, organisation in which they are employed, and their full address, incl. country.
- The text should be typed in Times New Roman with font size 10pt and with single spacing. Reference notes and footnotes should be typed at the bottom of the page to which they apply, and should be separated from the text by a line extending across the page. Pages should be numbered.
- Authors are advised that papers are published in double column format and that figures normally occupy a single column width. Lettering should not be less than 2mm at this scale.
- Internationally accepted symbols should be used. The SI system of units is preferred.
- **For those unable to [submit papers electronically](#), can also be submitted to rivers2007@gmail.com.**
